

## Subject Index of Volume 144

### Ab initio

- Theoretical quantum chemical study of spironaphthoxazines and their merocyanines. Thermal ring-opening reaction and geometric isomerization, 119

### Ab initio molecular dynamics

- Photochemistry from first principles — advances and future prospects, 229

### Absorption

- Spectral characteristics of bithiophenes and terthiophenes linked with heterocyclic unit in solution and polymer matrix, 73

### Absorption spectra

- Photochemistry of  $\mu$ -hydrido-tetrakis(tertiary phosphine)diplatinum complexes, 101

### Activation energy

- Characterization of a  $\text{TiO}_2$  photocatalyst synthesized by the solvothermal method and its catalytic performance for  $\text{CHCl}_3$  decomposition, 185

### Aggregate

- Solvent-related conformational changes and aggregation of conjugated polymers studied by single molecule fluorescence spectroscopy, 43
- Chromophore end-labelled long chain perfluoropolyether as probes to study the formation of aggregates in aqueous organic solvent and their asymmetrical coaggregation with hydrocarbons, 179

### Air/water interface

- Molecular arrangement and photochemistry of a bolaamphiphilic anthracene derivative in Langmuir–Blodgett film, 159

### Anatase structure

- Characterization of a  $\text{TiO}_2$  photocatalyst synthesized by the solvothermal method and its catalytic performance for  $\text{CHCl}_3$  decomposition, 185

### Bolaamphiphile

- Molecular arrangement and photochemistry of a bolaamphiphilic anthracene derivative in Langmuir–Blodgett film, 159

### Carbon nanotubule

- Controlling the optical properties of a conjugated co-polymer through variation of backbone isomerism and the introduction of carbon nanotubes, 31

### Chloroform decomposition

- Characterization of a  $\text{TiO}_2$  photocatalyst synthesized by the solvothermal method and its catalytic performance for  $\text{CHCl}_3$  decomposition, 185

### Chromophores

- Chromophore end-labelled long chain perfluoropolyether as probes to study the formation of aggregates in aqueous organic solvent and their asymmetrical coaggregation with hydrocarbons, 179

### Computational chemistry

- Photochemical processes: potential energy surface topology and rationalization using VB arguments, 237

### Conical intersection

- Introduction to the workshop on theoretical organic (photo)chemistry, 217

- Photochemistry by conical intersections: a practical guide for experimentalists, 221

- Photochemistry from first principles — advances and future prospects, 229

- Photochemical processes: potential energy surface topology and rationalization using VB arguments, 237

### Conjugated polymer

- Luminescence quenching by inter-chain aggregates in substituted polythiophenes, 3

- Solution processing of conjugated polymers: the effects of polymer solubility on the morphology and electronic properties of semiconducting polymer films, 21

- Controlling the optical properties of a conjugated co-polymer through variation of backbone isomerism and the introduction of carbon nanotubes, 31

- Solvent-related conformational changes and aggregation of conjugated polymers studied by single molecule fluorescence spectroscopy, 43

### Current-limiting

- Characterization and improvement of the contact between indium tin oxide and triphenyl diamine-doped polycarbonate, 53

### 3D optical storage

- Optical properties of photochromic fluorinated indolylfulgides, 83

### Davydov splitting (DS)

- On the luminescence efficiency of polymer light-emitting diodes: a quantum-chemical investigation, 57

### Diacetyl

- Photoinduced reduction of water by diacetyl, 153

### 3,4-Dichlorophenol

- Mechanism of photocatalytic oxidation of 3,4-dichlorophenol on  $\text{TiO}_2$  semiconductor surfaces, 205

### Diffuse reflectance spectra

- Correlation of  $\text{TiO}_2$  photocatalytic activity and diffuse reflectance spectra, 193

### Dye heterogenization

- Singlet oxygen generation using PDMS occluded dyes, 141

### Dynamics of photochemical processes

- Introduction to the workshop on theoretical organic (photo)chemistry, 217

### Energy transfer

- Energy transfer and optical gain studies of FDS: Rh B dye mixture investigated under cw laser excitation, 107

### Ethylene

- Photochemistry from first principles — advances and future prospects, 229

### Excitation energy transfer

- Luminescence quenching by inter-chain aggregates in substituted polythiophenes, 3

### Excitations

- Excited state dynamics of oligothiophenes studied by transient pump-probe spectroscopy, 13

- Excited state dynamics  
Origins of aggregation quenching in luminescent phenylenevinylene polymers, 63
- Exciton-exciton annihilation  
Solution processing of conjugated polymers: the effects of polymer solubility on the morphology and electronic properties of semiconducting polymer films, 21
- First-principles molecular dynamics  
Photochemistry from first principles — advances and future prospects, 229
- Fluorescence  
Spectral characteristics of bithiophenes and terthiophenes linked with heterocyclic unit in solution and polymer matrix, 73  
Photothermal effects and fluorescence spectra of tetrapyrrolyl-porphyrins, 93
- Fluorination  
Optical properties of photochromic fluorinated indolylfulgides, 83
- Formaldehyde  
Photoinduced reduction of water by diacetyl, 153
- Forster-Dexter theory  
Energy transfer and optical gain studies of FDS: Rh B dye mixture investigated under cw laser excitation, 107
- Fulgide  
Optical properties of photochromic fluorinated indolylfulgides, 83
- Halogenated  $\alpha$ -arylcinnamates  
Photochemical conversion of 2,6-dihalo substituted methyl  $\alpha$ -phenylcinnamates, 175
- 1,4-Hexadiene  
Photochemistry by conical intersections: a practical guide for experimentalists, 221
- Hydridodiplatinum complexes  
Photochemistry of  $\mu$ -hydrido-tetrakis(tertiary phosphine)diplatinum complexes, 101
- Hydrophobic  
Chromophore end-labelled long chain perfluoropolyether as probes to study the formation of aggregates in aqueous organic solvent and their asymmetrical coaggregation with hydrocarbons, 179
- 1-*o*-Hydroxyphenyl-2-(pentamethyldisilanyl)ethyne  
A novel photoreaction of 1-*o*-hydroxyphenyl-2-(pentamethyldisilanyl)ethyne, 167
- Indium tin oxide  
Characterization and improvement of the contact between indium tin oxide and triphenyl diamine-doped polycarbonate, 53
- Intramolecular photoreaction  
A novel photoreaction of 1-*o*-hydroxyphenyl-2-(pentamethyldisilanyl)ethyne, 167
- Lifetime  
Spectral characteristics of bithiophenes and terthiophenes linked with heterocyclic unit in solution and polymer matrix, 73
- Light-emitting diode (LED)  
Solution processing of conjugated polymers: the effects of polymer solubility on the morphology and electronic properties of semiconducting polymer films, 21  
On the luminescence efficiency of polymer light-emitting diodes: a quantum-chemical investigation, 57
- Luminescence  
Luminescence quenching by inter-chain aggregates in substituted polythiophenes, 3  
Photoluminescence of 8-quinolinolatomethylmercury(II), 69
- Mercury complexes  
Photoluminescence of 8-quinolinolatomethylmercury(II), 69
- meso*-Tetraphenylporphyrin  
Singlet oxygen formation and photostability of *meso*-tetraarylporphyrin derivatives and their copper complexes, 131
- Methanol oxidation  
Photoelectrochemical behaviour of methanol oxidation at nanoporous TiO<sub>2</sub> film electrodes, 197
- Monolayer  
Molecular arrangement and photochemistry of a bolaamphiphilic anthracene derivative in Langmuir-Blodgett film, 159
- Nanoporous TiO<sub>2</sub> film  
Photoelectrochemical behaviour of methanol oxidation at nanoporous TiO<sub>2</sub> film electrodes, 197
- Nonadiabatic dynamics  
Photochemistry from first principles — advances and future prospects, 229
- Oligothiophenes  
Excited state dynamics of oligothiophenes studied by transient pump-probe spectroscopy, 13
- Optical gain  
Energy transfer and optical gain studies of FDS: Rh B dye mixture investigated under cw laser excitation, 107
- Optical switches  
Optical properties of photochromic fluorinated indolylfulgides, 83
- Oxinate complexes  
Photoluminescence of 8-quinolinolatomethylmercury(II), 69
- Oxygen  
Mechanism of photocatalytic oxidation of 3,4-dichlorophenol on TiO<sub>2</sub> semiconductor surfaces, 205
- PC:TPD  
Characterization and improvement of the contact between indium tin oxide and triphenyl diamine-doped polycarbonate, 53
- PDMS  
Singlet oxygen generation using PDMS occluded dyes, 141
- Perfluoropolyether  
Chromophore end-labelled long chain perfluoropolyether as probes to study the formation of aggregates in aqueous organic solvent and their asymmetrical coaggregation with hydrocarbons, 179
- Phase of electronic wave function  
Photochemistry by conical intersections: a practical guide for experimentalists, 221
- Phenanthrenes  
Photochemical conversion of 2,6-dihalo substituted methyl  $\alpha$ -phenylcinnamates, 175
- Phenylenevinylene  
Origins of aggregation quenching in luminescent phenylenevinylene polymers, 63
- Photo-catalysis  
Mechanism of photocatalytic oxidation of 3,4-dichlorophenol on TiO<sub>2</sub> semiconductor surfaces, 205
- Photocatalytic oxidation  
Correlation of TiO<sub>2</sub> photocatalytic activity and diffuse reflectance spectra, 193
- Photochemical synthesis  
Photochemical conversion of 2,6-dihalo substituted methyl  $\alpha$ -phenylcinnamates, 175
- Photochemistry  
Chromophore end-labelled long chain perfluoropolyether as probes to study the formation of aggregates in aqueous organic solvent and their asymmetrical coaggregation with hydrocarbons, 179  
Photochemistry by conical intersections: a practical guide for experimentalists, 221  
Photochemical processes: potential energy surface topology and rationalization using VB arguments, 237

- Photochromic  
   Theoretical quantum chemical study of spironaphthoxazines and their merocyanines. Thermal ring-opening reaction and geometric isomerization, 119
- Photochromism  
   Optical properties of photochromic fluorinated indolylfulgides, 83
- Photocyclization  
   Photochemical conversion of 2,6-dihalo substituted methyl  $\alpha$ -phenylcinnamates, 175
- Photodimerization  
   Molecular arrangement and photochemistry of a bolaamphiphilic anthracene derivative in Langmuir–Blodgett film, 159
- Photodissociation  
   Photochemistry from first principles — advances and future prospects, 229
- Photoelectrochemistry  
   Photoelectrochemical behaviour of methanol oxidation at nanoporous TiO<sub>2</sub> film electrodes, 197
- Photoexcitation  
   Origins of aggregation quenching in luminescent phenylenevinylene polymers, 63
- Photoinduced water reduction  
   Photoinduced reduction of water by diacetyl, 153
- Photoisomerization  
   Photochemistry from first principles — advances and future prospects, 229
- Photoluminescence (PL)  
   Controlling the optical properties of a conjugated co-polymer through variation of backbone isomerism and the introduction of carbon nanotubes, 31  
   Origins of aggregation quenching in luminescent phenylenevinylene polymers, 63
- Photoluminescence spectroscopy  
   Solvent-related conformational changes and aggregation of conjugated polymers studied by single molecule fluorescence spectroscopy, 43
- Photolysis  
   Photochemistry of  $\mu$ -hydrido-tetrakis(tertiary phosphine)diplatinum complexes, 101  
   Singlet oxygen formation and photostability of *meso*-tetraarylporphyrin derivatives and their copper complexes, 131
- Photoreaction  
   Photothermal effects and fluorescence spectra of tetrapyrroldiporphyrins, 93
- Physical dimers  
   Luminescence quenching by inter-chain aggregates in substituted polythiophenes, 3
- Poly(paraphenylenevinylene) (PPV)  
   On the luminescence efficiency of polymer light-emitting diodes: a quantum-chemical investigation, 57
- Polymer matrices  
   Spectral characteristics of bithiophenes and terthiophenes linked with heterocyclic unit in solution and polymer matrix, 73
- Porphyrin  
   Singlet oxygen formation and photostability of *meso*-tetraarylporphyrin derivatives and their copper complexes, 131  
   Singlet oxygen generation using PDMS occluded dyes, 141
- Pyrazines  
   Spectral characteristics of bithiophenes and terthiophenes linked with heterocyclic unit in solution and polymer matrix, 73
- Reaction mechanism  
   Photochemical processes: potential energy surface topology and rationalization using VB arguments, 237
- Silacyclopentene  
   A novel photoreaction of 1-*o*-hydroxyphenyl-2-(pentamethyldisilyl)ethyne, 167
- Single molecules  
   Solvent-related conformational changes and aggregation of conjugated polymers studied by single molecule fluorescence spectroscopy, 43
- Singlet molecular oxygen  
   Singlet oxygen generation using PDMS occluded dyes, 141
- Singlet oxygen  
   Singlet oxygen formation and photostability of *meso*-tetraarylporphyrin derivatives and their copper complexes, 131
- Sol–gel method  
   Characterization of a TiO<sub>2</sub> photocatalyst synthesized by the solvothermal method and its catalytic performance for CHCl<sub>3</sub> decomposition, 185
- Solvothermal method  
   Characterization of a TiO<sub>2</sub> photocatalyst synthesized by the solvothermal method and its catalytic performance for CHCl<sub>3</sub> decomposition, 185
- Spironaphthoxazine  
   Theoretical quantum chemical study of spironaphthoxazines and their merocyanines. Thermal ring-opening reaction and geometric isomerization, 119
- Stability  
   Optical properties of photochromic fluorinated indolylfulgides, 83
- Stern–Volmer plot  
   Energy transfer and optical gain studies of FDS: Rh B dye mixture investigated under cw laser excitation, 107
- Stilbenes  
   Photochemical conversion of 2,6-dihalo substituted methyl  $\alpha$ -phenylcinnamates, 175
- Terthiophenes  
   Spectral characteristics of bithiophenes and terthiophenes linked with heterocyclic unit in solution and polymer matrix, 73
- Tetrapyrroldiporphyrins  
   Photothermal effects and fluorescence spectra of tetrapyrroldiporphyrins, 93
- Theoretical models for photoreactions  
   Introduction to the workshop on theoretical organic (photo)chemistry, 217
- Thiophenes  
   Spectral characteristics of bithiophenes and terthiophenes linked with heterocyclic unit in solution and polymer matrix, 73
- Time-resolved photothermal spectra  
   Photothermal effects and fluorescence spectra of tetrapyrroldiporphyrins, 93
- TiO<sub>2</sub>  
   Correlation of TiO<sub>2</sub> photocatalytic activity and diffuse reflectance spectra, 193  
   Mechanism of photocatalytic oxidation of 3,4-dichlorophenol on TiO<sub>2</sub> semiconductor surfaces, 205
- TiO<sub>2</sub> photocatalyst  
   Characterization of a TiO<sub>2</sub> photocatalyst synthesized by the solvothermal method and its catalytic performance for CHCl<sub>3</sub> decomposition, 185
- Transient spectroscopy  
   Excited state dynamics of oligothiophenes studied by transient pump-probe spectroscopy, 13
- Triethanolamine  
   Photoinduced reduction of water by diacetyl, 153

# Guide for Authors

## Submission of Papers

Authors are requested to submit their manuscripts to

### Editor-in-Chief: Professor R.P. Wayne

Physical and Theoretical Chemistry Laboratory  
South Parks Road  
Oxford OX1 3QZ  
UK

FAX: +44 (1865) 275410

E-MAIL: [jphoto@physchem.ox.ac.uk](mailto:jphoto@physchem.ox.ac.uk)

Authors in the USA and Canada may submit their manuscripts to the North American Editor:

### Professor R.P. Steer

Thorvaldson Building  
University of Saskatchewan  
110 Science Place  
Saskatoon, SK  
Canada S7N 5C9  
FAX: +1 (306) 966 4730  
E-MAIL: [steer@sask.usask.ca](mailto:steer@sask.usask.ca)

Authors in Asia should submit their manuscripts to the Asian Editor:

### Professor H. Masuhara

Department of Applied Physics  
Osaka University  
2-1 Yamada-oka  
Suita, Osaka 565-0871  
Japan  
FAX: +81 6 6876 8580  
E-MAIL: [masuhara@ap.eng.osaka-u.ac.jp](mailto:masuhara@ap.eng.osaka-u.ac.jp)

The full postal address, fax and telephone numbers, and e-mail address of the corresponding author must be given on the first (title) page of the manuscript.

Contributions are accepted on the understanding that authors have obtained the necessary authority for publication. Submission of an article is understood to imply that the article is original and unpublished and is not being considered for publication elsewhere. Upon acceptance of an article by the journal, the author(s) will be asked to transfer the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

## Language

Papers will be published in English.

Authors in Japan please note that information about how to have the English of your paper checked corrected and improved (*before submission*) is available from: Elsevier Science Japan, Editorial Service, 1-9-15 Higashi Azabu, Minato-ku, Tokyo 106-0044, Japan; Tel: +81-3-5561-5032; Fax: +81-3-5561-5045; E-mail: [info@elsevier.co.jp](mailto:info@elsevier.co.jp)

## Manuscript Preparation

Three copies of the manuscript should be submitted, in double-spaced typing on pages of uniform size with a wide margin on the left. Some flexibility of presentation will be allowed but authors are urged to arrange the subject matter clearly under headings such as Introduction, Experimental details, Results, Discussion, etc. References should be numbered consecutively (numerals in square brackets) throughout the text and collected together in a reference list at the end of the paper. Journal titles should be abbreviated according to the Chemical Abstracts Service Source Index, 1970 edition, and supplements. The abbreviated title should be followed by volume number, year (in parentheses) and page number. Authors are reminded that delays in publication may occur if the instructions for submission and disk and manuscript preparation are not strictly followed. Authors are strongly recommended to submit disks to aid rapid processing. To facilitate communication, authors are requested to provide their current e-mail address, phone and fax number.

## Illustrations

Line drawings and cyclic or aromatic formulae should be in a form suitable for reproduction, drawn in Indian ink on drawing paper. They should preferably all require the same degree of reduction, and should be submitted on paper of the same size as, or smaller than, the main text to prevent damage in transit. Photographs should be submitted as clear black-and-white prints on glossy paper. Each illustration must be clearly numbered. "Quantity calculus" notation should be used for the labelling of the graph axes. Legends to the illustrations must be submitted in a separate list. All tables and illustrations should be numbered consecutively and separately throughout the paper.

## Offprints

Offprints can be ordered at prices shown on the offprint order form.

## Further Information

All questions arising after acceptance of a paper, especially those concerning proofs, should be directed to Elsevier Science Ireland, Elsevier House, Brookvale Plaza, East Park, Shannon, Co. Clare, Ireland (Tel.: +353 (61) 709600; Fax: +353 (61) 709111; E-mail: [postmaster@elsevier.ie](mailto:postmaster@elsevier.ie)). The full and complete Instructions to Authors can be found on the World Wide Web: access under <http://www.elsevier.com>.

*Choose from broad collections of primary journal literature and powerful secondary databases, all deliverable via the Internet or your local Intranet—building blocks for the digital library you need.*

## **For the Digital Library You Want**

ScienceDirect offers desktop access to over 1 million articles published in nearly 1,200 journals spanning 16 fields of science and provides researchers with some 2 million bibliographic citations and abstracts. Access may also be provided to an additional 30 million abstracts via ScienceDirect's secondary databases.

### **Unprecedented content, navigability and customization options**

Whether you choose the breadth of the ScienceDirect multi-publisher platform or one of our discipline or industry-focused solutions, you'll be providing your institution with a dynamic, efficient and integrated solution to access the world's critical STM literature.
